

PaynetEasy Oscommerce

«PaynetEasy» module installation

1. Uploading the “PaynetEasy” payment module to the server

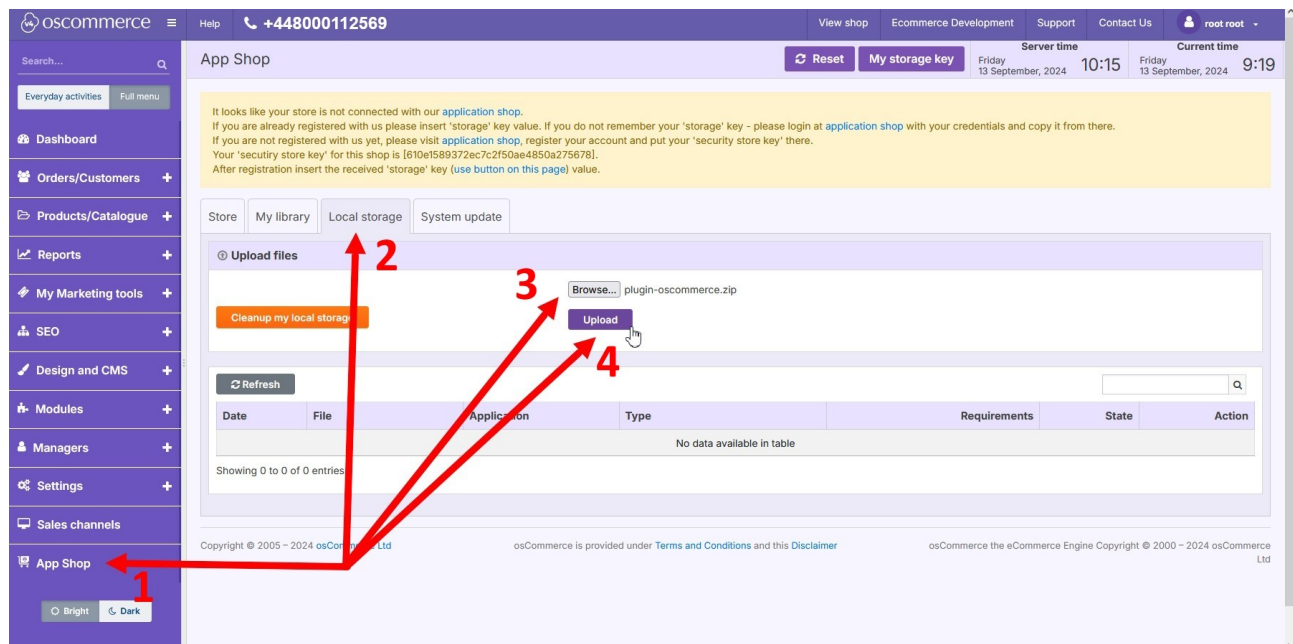

Log in as an administrator.

Click on the «App Shop» tab. (1 on pic.)

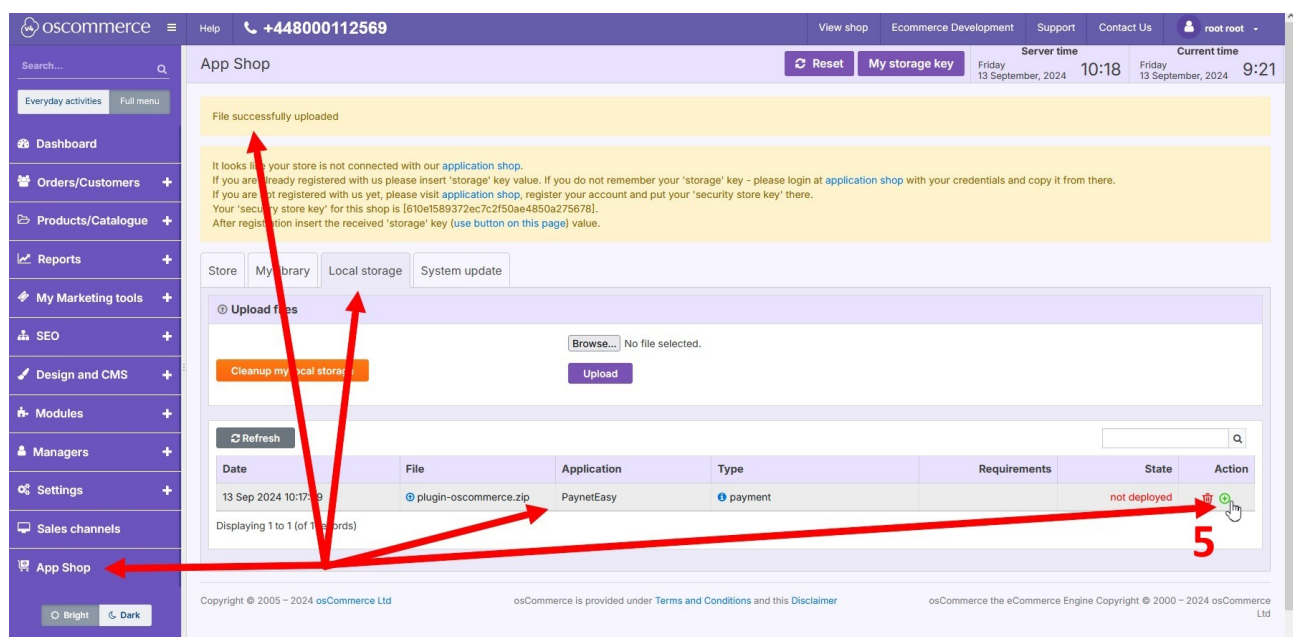

On the page that opens, select the «Local storage» tab. (2 on pic.)

Click the browse... button and select the archive with plugin-oscommerce module. (3 on pic.)

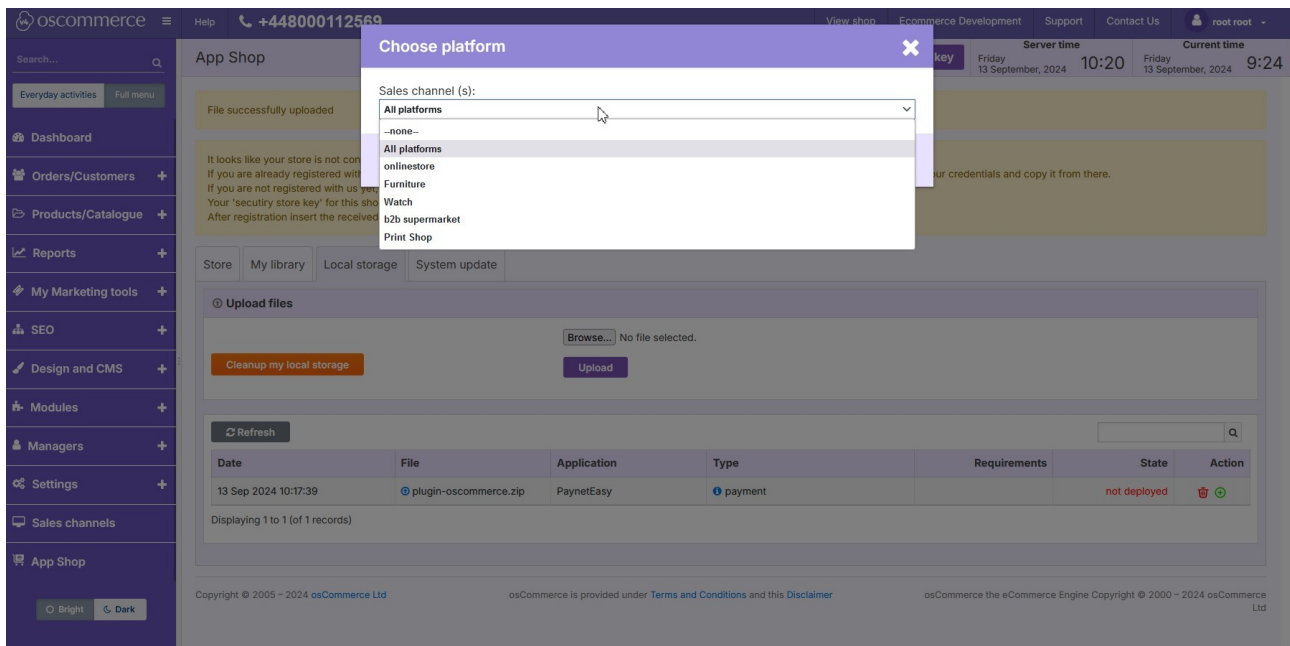

Click Upload button. (4 on pic.)

After successful download, a line with the downloaded module will appear, click the «+» (Deploy) button on the line with the «PaynetEasy» module. (5 on pic.)

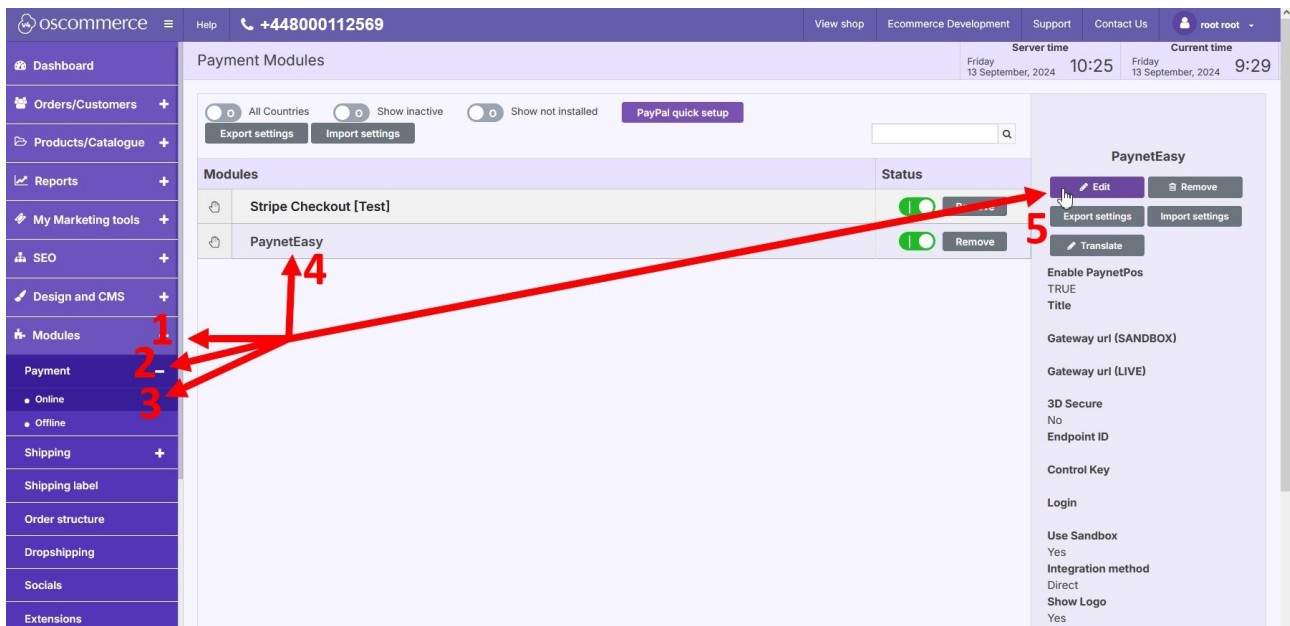

In the window that opens, select a store or all stores.

2. Setting up the «PaynetEasy» payment module

Go to the «Modules» tab (1 on pic.), then select the «Payment» tab (2 on pic.) and then select the «Online» tab (3 on pic.).

Click on the line with the «PaynetEasy» module (4 on pic.) and click on the «Edit» button (5 on pic.).

On the opened page with «PaynetEasy» module settings, enter the received data from Paynet Payments and configure the module to start working.
